**Short bio:**

Reza Yousefi Nooraie is a post-doctoral fellow at the Institute of Health Policy, Management, and Evaluation (IHPME), University of Toronto. He obtained his medical doctorate at Tehran University of Medical Sciences, and his Masters and PhD of Health Research Methodology at McMaster University, and was a Vanier Canada Scholar. He is currently studying the use of network analysis in studying partnership among health quality improvement teams. Reza's main line of interest includes using social network analysis lens to understand the process and to design effective interventions aiming to promote knowledge translation (KT), program implementation, and patient engagement. He is also interested in mixed methods studies, and the dialogue between quantitative and qualitative approaches.
